18: What do you like most about this course and/or the instructor's teaching of it?

Number of Respondents: 7 (77.8%)

not much. non of the article material was clear. (this type of reading is near impossible for me to comprehend anyhow)

Josh was very quick to respond to any questions or concerns from the students and really stimulated our minds with questions that he would include in the lectures

We definitely covered all the material in the book over the 6 weeks.

He did well

The subject matter was very interesting and engaging

I like how this class is at a steady pace and not too fast like other classes that I have taken. Also, the workload is only a bit demanding so that, at least for me, I am not too relaxed and yet not too stressed out.

Joshua is very involved in this course, especially for an online course! His comments and feedback are helpful and specific, and really stimulate further learning. I have taken online courses before that felt incredibly dry and disengaged, but this course truly has been a great experience!

19: What about this course and/or the instructor's teaching of it needs change or improvement?

Number of Respondents: 6 (66.7%)

TRANSLATE what the articles are saying in your lectures in laymen's terms. A language thats MUCH easier to understand and comprehend.

I think I would've enjoyed more of an interactive course, its tough to take an ethics class online because ethics is so discussion based

There is just so much to do with so little time. Really the issue is the discussions because you have to rely on other students to post. This becomes an issue when no one has posted by 4 PM, you have to go to work and will not be home till after the due date.

Nothing

I cannot think of any changes or improvements.

I think that there are not enough graded assignments. I personally struggled with the quizzes as I was confused by many of the questions' wording. This hurt my grade, but if there had been more assignments this would have been beneficial as this would provide more opportunity to improve grades!

20: What suggestions can you offer that would have made this course a better learning experience for you?

Number of Respondents: 7 (77.8%)

none

Maybe videotape lectures/supply audio of lectures rather than just supply us with a word document. Maybe more simpler discussion posts just so we could hear others viewpoints

Make the initial discussion posts due at one time then the replies due a little later.

Nothing

Maybe giving the students more of a chance to discuss the topics besides the 2 discussion posts. These topics are very controversial and I bet I wasn't the only one with a strong opinion on it.

I do not have any suggestions for how this course could be a better learning experience for me.

Aside from adding more graded assignments for the benefit of grade levels, this also would have helped my learning as it would have been another way for me to solidify my knowledge from the previous week's readings. Perhaps if the discussions were every week, this may have been helpful!

21: Any additional comments?

Number of Respondents: 4 (44.4%)

none

None

Josh was very understanding when I asked for extensions due to my recent surgery, I really appreciated his understanding

This has probably been one of the few classes that I have taken in which I have learned a lot and I know that this material will stick in my brain without forgetting about the material within a year. Thank you for having this class available to students like me.
